doumbiadramane94@gmail.com

- Create and Execute Cursors in Store Procedures
- Syntax for Cursors in Store Procedures
- Begin and End in Store Procedures
- Create an audit table and trigger.
- The usage of trigger and record audit information
- The importance and usage of Functions

**VB.NET Programming**
**Java Programming**

- Multithreading and Synchronization
- Files Handling and I/O
- Process table from Database by Passing Parameters
- Reflections
- XML Programming
- Exception Handling

**SDLC (Software Development Life Cycle)**

- Systems Planning
- Systems Analysis
- Systems Design
- Systems Implementation
- System Support and Security

**PHP & MYSQL**
**Network Communications**

- Troubleshooting
- Subnetting and Ip addresses
- The importance and usage of Switches, Routers, and nodes
- Configuration of Switches, Routers and Nodes
- The importance of spanning-tree
- Configuration of Telnet
- The importance and usage of Static Route
- Configuration of VLAN
- Set up Trunk mode.
- The importance and usage of RIP (Routing Information Protocol) version 1 and 2

**Crystal Report**

- Create and manage multiple forms.
- Grouping
- Sections
- Charts
- Parameters
